

CAST-IN-PLACE CONCRETE TOPPING SLAB

Distinctive, self-assured, and made to last through the ages, our cast-in-place concrete topping slabs are the real deal. Completely customizable down to the color, aggregate exposure, and finish, each floor has its own unique characteristics and is meticulously installed and finished by our expert technicians. Our signature burnished finish has a more natural, industrial look, while our diamond polished finish lends a slick, light-reflecting luster to any space.
